Castioni Arco Elevated Cable Route

Product Description

ARCO System: lightweight GRP elevated cable route to contain and protect cables at the lineside. The system is designed to be supported on posts at 6-metre spacing, thus reducing associated ground disturbance risks of other conventional products that are supported at 1.5-metre spacings. 6-metre lengths of ARCO GRP troughing are light enough to be manually handled by one person.

Scope of Acceptance

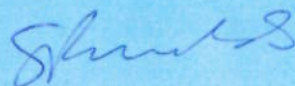

Full Acceptance.

For use as an elevated cable route to contain and protect cables on supports at the lineside on Network Rail's estate.

Not accepted for use as a ground-based cable route.

Network Rail Acceptance Panel (NRAP) hereby authorises the product above for use and trial use on railway infrastructure for which Network Rail is the Infrastructure Manager.
